We subscribe to patient information locator through The Carequality/Surescripts National Record Locator Service. The service locates patient records within third-party EHRs, electronic document repositories, or other HIEs and facilitates the exchange of relevant patient information with the requesting care provider's EHR system. It provides the following benefits to your provider: improved patient health outcomes by offering providers real-time electronic access to patient records located throughout the country and reduced need for processing clinical record requests manually. You do have the right to "opt out" of your records being accessed by us through this locator service and you can do that by completing a form available from our front desk staff.
